Office Action Summary	Application No. 09/303,716	Applicant(s) POWELL ET AL.	
	Examiner Charles L. Patterson, Jr.	Art Unit 1652	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136 (a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

Art Unit: 1652

Applicant has amended the second paragraph on page 2 to include all of the continuity information. However, they has not canceled the amendment filed 4/30/99 that directed that the parent and grandparent application continuity information be placed "before the first line" of the specification. The examiner has canceled this paragraph. If applicants do not agree with this they should so notify the examiner in the reply to this office action.

Claims 26-34, 37, 40, 43, 46 and 49 are withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected invention, there being no allowable generic or linking claim. Applicant timely traversed the restriction (election) requirement in Paper No. 7.

Claims 36, 39, 42, 45 and 48 are rejected under 35 U.S.C. 112, first paragraph, as containing subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. This rejection is repeated for the reasons given in the last action. Applicants arguments have been carefully considered but do not overcome the instant rejection.

Applicants argue that the claimed subject matter is fully enabled and that 35 U.S.C. 112, first paragraph only requires objective enablement. They argue that actual examples are not required to comply with the first paragraph and that the test for enablement is not whether any experimentation is necessary but whether the experimentation is undue. Applicants also provide a 1998 reference showing that a trigonal boronic acid hapten can be used to produce a catalytic antibody.

Art Unit: 1652

It is maintained that the experimentation required to practice the claimed invention would be undue given the broad category of hapten shown in the instant claims and the fact that there is not one example given where a catalytic antibody has ever been made using any of these wide ranging possible haptens. The catalytic antibody art is unpredictable and the reference presented, Gao, et al. (U), is indicative of this. While the reference does show that a trigonal boronic hapten will produce a catalytic antibody, the hapten is not the same as that of the instant claims (even given the wide array of molecules this entails). One particular hapten (3a) produces a catalytic antibody that will act on one substrate (1a). The catalytic antibody produced will not hydrolyze the cleavage of the L-proline substrate (1b) and will not catalyze the cleavage of either ester substrate (1c or 1d). See the paragraph spanning pages 2216-2217 and the next paragraph.

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

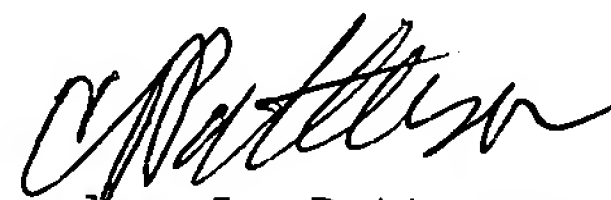

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
